

Drawing Ranking Sheet

Professor name: _____ (Evaluator 1 of 3)

For each numbered set (each set contains three pencil drawings, labeled (a), (b), (c), of the same object, made by the same person). Rank the three drawings from **1 (best)** to **3 (worst)**. No ties — each of 1, 2, 3 must be used exactly once per row.

Judge on: are the parts the right size relative to each other; are they in the right places; are the lines confident rather than shaky or drawn over repeatedly; is it clear what the object is.

Ignore completely: paper colour, how bright or dark the scan is, how hard the pencil was pressed, smudges, and anything outside the drawing.

All drawings are by people who are not artists. Compare them only to each other, not to a photo or a professional illustration.
