

Rank Drawing

From best (1) to worst (3)

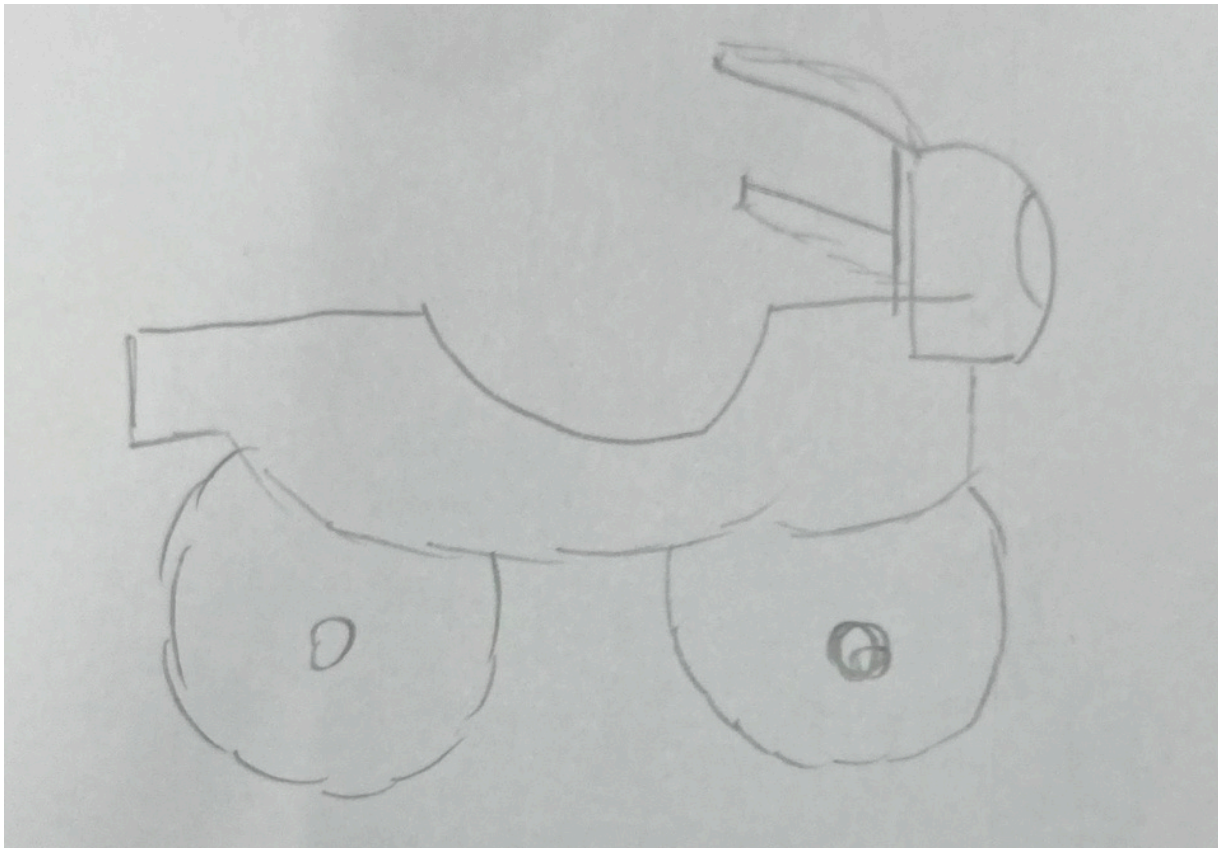

You will see 36 pages. Each page has three pencil drawings of the same thing, all made by the same person. Put them in order from best to worst.

Judge on: are the parts the right size relative to each other; are they in the right places; are the lines confident rather than shaky or drawn over repeatedly; is it clear what the object is.

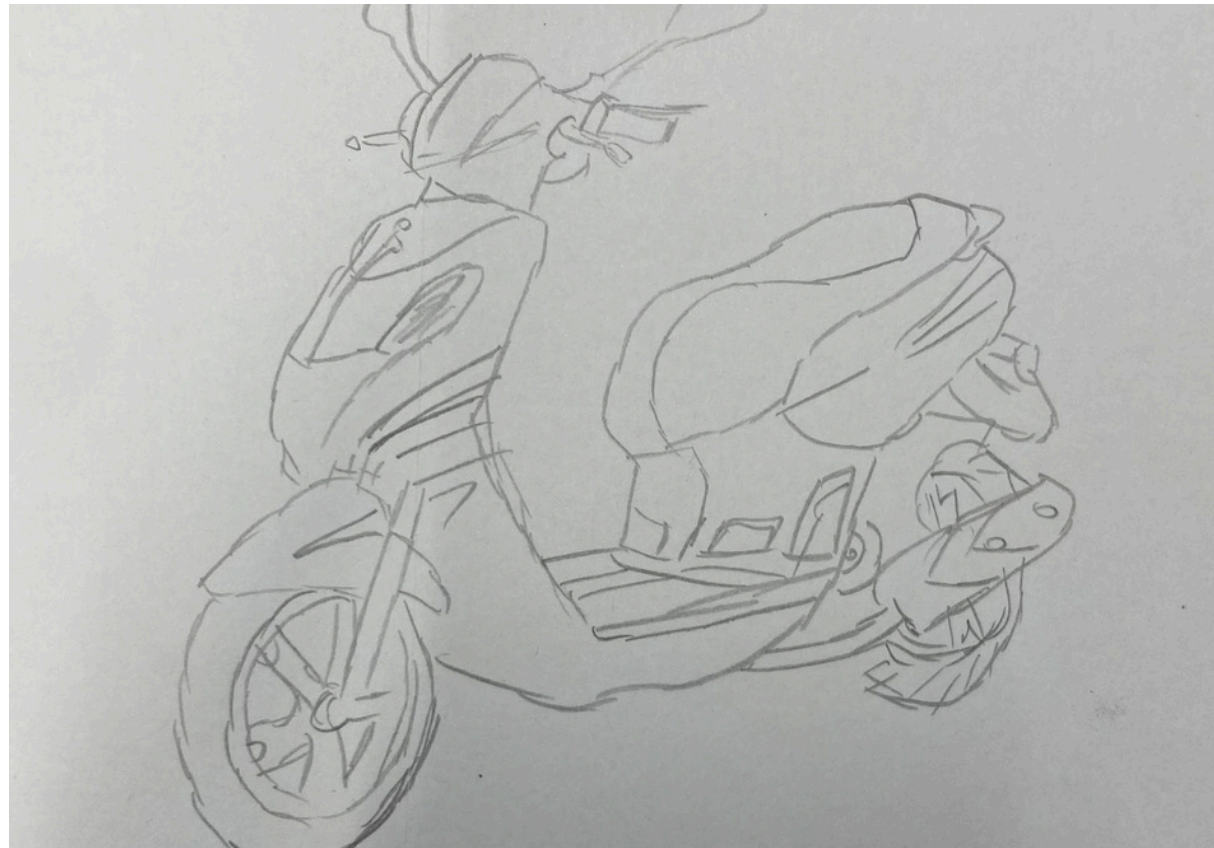

Ignore completely: paper colour, how bright or dark the scan is, how hard the pencil was pressed, smudges, and anything outside the drawing.

All of these are by people who are not artists. Compare them only to each other, not to a photo or a professional illustration. You must give a full order (no ties).

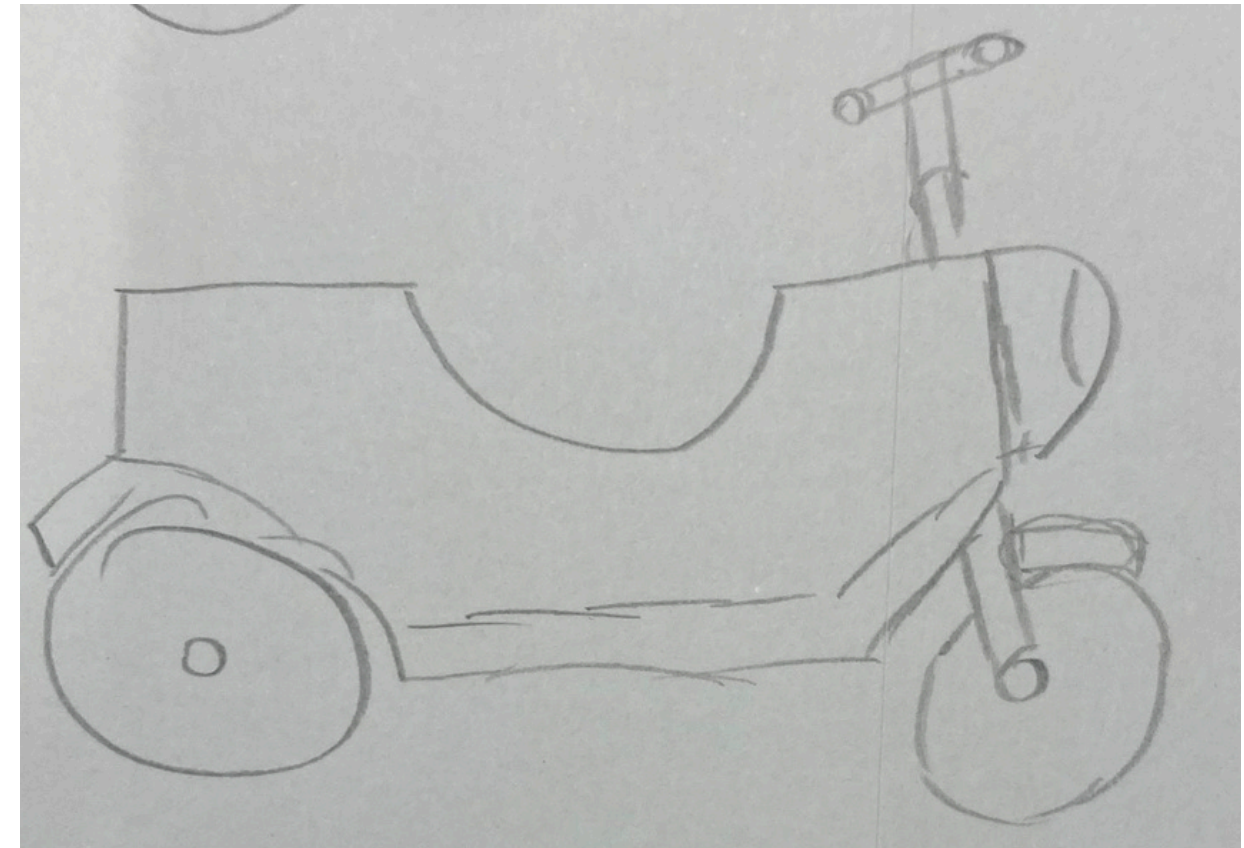

1.

(a)

(b)

(c)

The three pencil drawings of the same thing, all made by the same person.

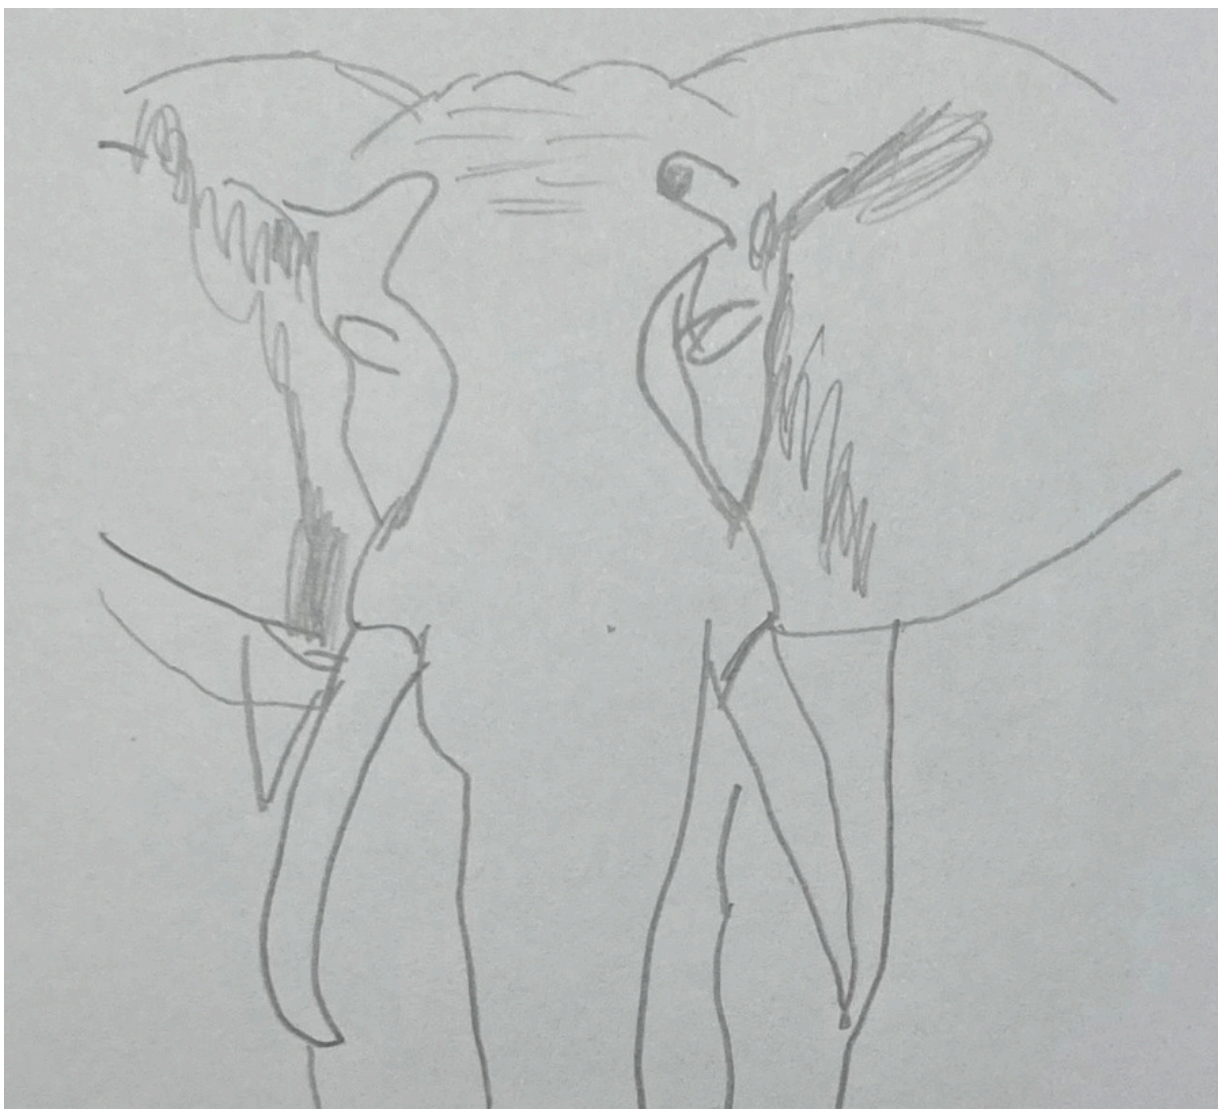

Put them in order from best (1) to worst (3).
